

ABET LAMINATI

CUBICLE
COLLECTION

GENERAL INFORMATION

The Cubicle Collection is manufactured in the most modern and largest HPL factory in Europe and conforms to all the requirements of BS EN 438 :2005. Offering a hardwearing, impact resistant and very attractive decorative surface, stock is available in postforming (HGP) grade, with HGS and HGF grades available to special order. Normal stock size is 3660x1610mm in thickness 0.8mm and in Finish Six texture. 4200x1610/1860mm is also available to special order. Finish Six is a fine-grained texture offering a low glare surface and a limited resistance to finger marks.

Solid Grade 12mm is stocked in standard (CGS) grade with a black core and CGF grade is available to special order. Stock size is 3660x1610 in thickness 12mm and in Finish Six texture. We strongly recommend that all ABET LAMINATI HPL products are stored, conditioned and fabricated in accordance with our own and BLFA guidelines.

CLEANING AND MAINTENANCE

The Cubicle Collection will give years of excellent service provided a few simple rules are followed.

Light dirt or stains can be removed easily with warm water and mild detergent. Stubborn marks should be removed using a non-abrasive cream cleaner or mild domestic bleach. Harsh abrasives or scouring powders should be avoided. Grease marks can be removed with a proprietary paint and graffiti remover. Hair dyes, bleaches, caustic alkalis and strong mineral acids should be wiped off within a short period.

More detailed technical information brochures are available from our office and/or your local distributor.

STYLISH AND PRACTICAL

ABET LAMINATI manufactures the world's most innovative laminates created by the best Italian and international designers. It is Europe's largest producer of HPL products. Our UK and Ireland office is based in London's Docklands and supplies over 1000 laminate designs in a variety of finishes, sheet sizes and thicknesses - arguably the most comprehensive collection available anywhere.

Our UK and Ireland network of technical sales representatives will provide advice on the use of laminates for every application: the conventional, the unusual, the high performance and the purely decorative. Whatever your project, we can help you to find the right laminate solution.

HPL COLOUR OPTIONS

The Cubicle Collection is available in 32 plain colours, 6 Legni and complimentary speckle effects in laminate specially selected for applications in areas of heavy usage or vandalism. The decorative surfaces with easy to clean texture are enhanced by the solid black core offered as a standard feature of this collection.

The sheet size of 3660x1610mm is available in 0.8mm post-forming and 12mm solid grade making both versatile and economic in use offering a tough durable product resistant to vandalism, impact

and water. The 12mm thickness ensures that the laminate can be used in conjunction with the majority of available fittings and fixing systems.

The Cubicle Collection is particularly recommended for use in schools, leisure centres, swimming pools and high traffic public areas, such as airports, stations and places of entertainment. Other recommended uses include hospitals, laboratories and food preparation areas where wood cores and joints are unacceptable for health reasons.
