

Bench Seating

For a complete changing room area, Cubicle Centre can now supply made to measure bench seating.

Standard bench seating consists of square section (25mm) steel supports, in a black powder coated finish. These support a robust Compact Grade Laminate (13mm thick) top which is completely water resistant.

Various non-standard types of bench seating can be made to order, such as 'island' systems complete with coat hook supports - contact us to discuss your requirements and to obtain a quote.
