

Case Study

August 2014 - Issue 15

Location	Links Primary School
Cubicle System	Brecon - Junior School Cubicles
Manufacturer	Cubicle Centre
Website	www.washroomcubicles.co.uk

Links Primary School first opened in 1912. The London school has survived two World Wars with little damage to the original building. Even though a bomb fell on the playground during World War Two.

The school needed to renovate the washrooms facilities. Cubicle Centre offered made-to-measure solutions to adapt to the historic architecture.

Cubicle Centre provided toilet cubicles, vanity units and bench seating for three different washrooms. The school wanted to take advantage of the exclusive vinyl designs on offer. But which should they choose?

Well they chose three different designs for each washroom. Colourful Chameleons, Space Adventure and Ocean View. These were applied to the toilet cubicle doors and the front panels of the vanity units.

“The school can be a difficult location to renovate due to it’s architecture and age. The cubicles and panels supplied by Cubicle Centre were an ideal made-to-measure solution. The products are great quality and the vinyls were a popular design choice with the teachers and pupils.”
