

## Acrylic Splashbacks

- Cost-effective glass alternative
- 100% waterproof
- Panels can be cut on site
- Scuffs can be polished away
- High heat resistance

Acrylic splashbacks are beautiful and tough. The acrylic glass is 4mm thick with a back painted surface available in a range of colours. This gives a fantastic colour intensity and reflection through it's surface, just like coloured glass.

Our acrylic panels are an affordable alternative to glass and ceramic tiles. The highly durable panels are 25 times more impact resistant than traditional glass. So it will not shatter.

It also has a high heat resistant of up to 100°C. The material is also 100% waterproof so ideal for the washroom environment.
